

Exploring the potential of multipurpose crops towards soil conservation and sustainable production to face climate challenges

Patrícia Vidigal, Filipa Monteiro, Maria Manuel Abreu, João Santos Silva, Wanda Viegas

Session VII - Symposium 15.1&2 - Role of agriculture in the climate change era for achieving the Sustainable Development Goals | 1st August 2019 | Lisbon

The grid contains 25 slides with the following titles and key content:

- Slide 1:** Ecology across borders Embedding Ecology in Sustainable Development Goals 29 July - 2 August 2019, Lisbon, Portugal
- Slide 2:** Exploring the potential of multipurpose crops towards soil conservation and sustainable production to face climate challenges
- Slide 3:** The Global Soil Test - 2019
- Slide 4:** Temperature increase - 1.5°C
- Slide 5:** Food Crop Number
- Slide 6:** MORE LAND
- Slide 7:** SUITABLE LAND
- Slide 8:** We need to innovate in how we eat and farm
- Slide 9:** There are over 12,000 crop species classified as suitable for human consumption, but the majority of the world's food is only 40 crops.
- Slide 10:** We need to innovate in how we eat and farm
- Slide 11:** Orphan Crops
- Slide 12:** Orphan Crops
- Slide 13:** Orphan Crops
- Slide 14:** Orphan Crops Challenges
- Slide 15:** Orphan Crops
- Slide 16:** Orphan Crops
- Slide 17:** Lablab purpureus (L.) Sweet
- Slide 18:** Multipurpose uses
- Slide 19:** Marginal Land | Traditional Olive Orchard areas
- Slide 20:** Marginal Land | Young areas of the Sericea Pinnata Range
- Slide 21:** Rotation with industrial crops (green manure) | water efficiency
- Slide 22:** Hyacinth bean | Fatty acids
- Slide 23:** Orphan Crops
- Slide 24:** Orphan Crops
- Slide 25:** Orphan Crops
